DETAILED ACTION

Response to Amendments

Applicant's amendment filed on 6/10/2004 has been considered and entered. As a result of amending claims 4, 5, 7, 12, and 13, All 35 U.S.C 102 rejections have been overcome.

Specification

The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Allowable Subject Matter

Claims 1-15 are allowable.

The following is an examiner's statement of reasons for allowance: Claims 1-15 are allowed over the prior art of record. The prior art fails to teach or suggest a method and an analog to digital converter that implement a technique of canceling temporary variation which is caused in the input signal as a result of setting the reference signal, during conversion of the input signal into a target signal by a second adjustment unit.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Cited References

The prior art made of record and not replied upon is considered pertinent to application's disclosure. The cited references relate to analog to digital converter with adjustment circuits.
